## Harlequin Voodspring

Harlequin Woodspring is a wooden sprung floor system that is a modern update of the traditional 'basket weave' construction. It has a counter batten configuration, comprising a triple layer of custom machined southern yellow pine arranged at right angles. Shock absorption and energy return are enhanced by dual-density elastomer blocks attached at predetermined intervals to the underside. Layers of flexible MDF and plywood panels are installed on the battens which support the chosen Harlequin performance top surface. Harlequin Woodspring is suitable for all genres of dance.

Performance surface: Harlequin Woodspring can be used with a variety of Harlequin performance surface options from the Harlequin range of performance vinyls and solid or engineered wood finishes.

Installation: Harlequin Woodspring can be laid on any smooth flat surface. If a Harlequin vinyl performance floor is chosen, a moisture-resistant suspension board will be included underneath, along with a colour-matched composite edging profile which will be installed around the finished edges. If a solid hardwood or engineered wooden top surface is chosen, the skirting will be optional.

## **Specification Guide**

_	
Permanent	Not to scale
91mm without a top surface	Selected Harlequin
96mm including 14mm engineered top surface	vinyl performance floor
102mm including 20mm solid wood top surface	
24kg/m <sup>2</sup> (Without surface)	
BS EN 14904:2006	
64%	Moisture suspensi Select WBP ply Triple layer of custom machined southern yell Dual density shock dampening elastomer block at predetermind intervals
3.3mm	
14.9%	
>1500 N
